

# Rosidal® TCS

## Two-component compression system

'It's all in the mix': This is also true for Rosidal TCS, the Rosidal Two-Component System. Two products have been combined to form a safe system: the innovative padding compression bandage Rosidal SC (Soft Compression) with integrated fabric skin protection coupled with the cohesive short stretch compression bandage Rosidal CC (Cohesive Compression). User-friendliness for both healthcare professionals and patients makes this an attractive solution.

Because of the Safe-Loc feature this is a system which is easy to apply at full stretch and comfortable to wear. The low resting pressure is a clear advantage in terms of compliance, especially at night. The Rosidal TCS system components are not made with natural rubber latex and are therefore a good alternative for those people with latex hypersensitivity.

### Fields of application

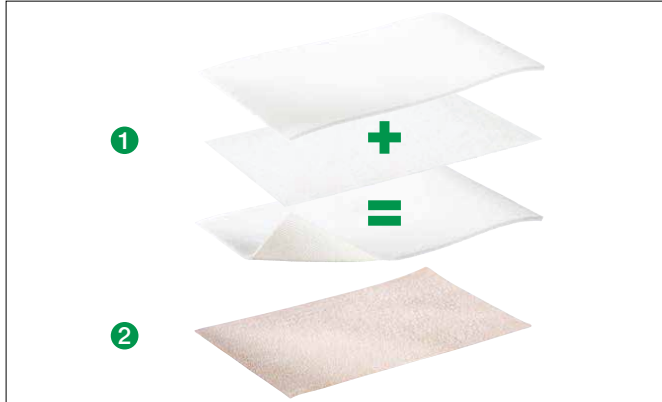

- for the treatment of lower leg ulcers and concomitant conditions
- for the treatment of chronic oedema

### Properties

- two components combined in a handy, ready-for-use set
- integrated skin protection in the first layer
- cohesive second layer
- ensures good mobility in the ankle joint
- permeable to air
- high working pressure, low resting pressure

## Rosidal® TCS

### Two-component compression system

#### Product structure

- ① Padding compression bandage  
with integrated fabric skin protection
- ② Short-stretch compression bandage  
cohesive

#### Advantages

- the Safe-Loc system: absolutely simple without pressure indicators – safe application at full stretch
- padding compression bandage with integrated skin protection – for high wearing comfort
- cohesive compression bandage – adheres to itself and reduces the risk of slipping due to its high degree of stiffness
- thin and supple – fits easily into shoes
- low resting pressure helps greatly with compliance

#### To note

- system is intended for single use only
- therapeutic working pressure is maintained for several days
- applied at full stretch (Safe-Loc)
- not made with natural rubber latex

#### Product composition

The system consists of:

- soft compression bandage (Rosidal SC) = first layer
- cohesive compression bandage (Rosidal CC) = second layer
